ULTIMATE WINTER PERFORMANCE

The V- & W-speed rated BluEarth WINTER V906 and BluEarth WINTER V906 SUV are Yokohama's all-new winter performance tires for sedans, CUVs and smaller SUVs. Your customers are sure to appreciate the confident snow, ice and wet performance as well as the dry road handling and longer tread life.

ADAPTIVE 3D SIPES

Every tread block contains numerous three-dimensional sipes that create thousands of biting edges for powerful traction on ice and snow.

ANGLED V-SHAPED GROOVES

Create a directional tread pattern that channels water, slush and snow from beneath the tread area to reduce the risk of hydroplaning.

SILICA RICH COMPOUND

Provides superior performance on wet and icy road surfaces.

UNIQUE DIRECTIONAL TREAD

Provides an increased contact area for powerful grip on snow, slush and ice.

ROBUST CONSTRUCTION

A highly rigid bead filler provides precise and responsive handling on cleared winter roads.

UNIFORM TREAD BLOCKS

Are positioned to improve overall road contact and promote even tread wear.

ADVANCED REACTION TECHNOLOGY

Provides a more flexible compound to create a larger contact area that contributes to even treadwear.
